

ACHIEVEMENTS & HACKATHONS

Hack4Help (Israeli Indian Hackathon)

Top 10 Finalist | Team Lead

Led a multidisciplinary team to design a smart bandage system. Qualified through multiple screening rounds to present a functional hardware-software demo in the finals.

- Integrated temperature sensors with Arduino for real-time monitoring.
- Oversaw development of a live data dashboard and coordinated integration of hardware and software components
- Presented the final in-person pitch and functional demo during the 24-hour hackathon
- Selected among Top 10 teams based on innovation and feasibility.

Spark Tank Pitch – IIT Delhi

Presenter

Pitched an advanced smart bandage concept involving multiple biomarkers. Presented technical architecture and clinical relevance to an expert jury. Received feedback on translational potential and scalability in healthcare settings

EXPERIENCE

Independent Developer

2024 - Present

Designed and built multiple web applications and tools focusing on real-world use cases. Worked with APIs, frontend logic, and UI design to deliver functional, user-focused products
